Phytopathology

An International Journal

Official Organ of

The American Phytopathological Society

CONTENTS

Stacy Otto Hawkins ..... W. B. TISDALE 1123
The parasitism of Polyporus schweinitzii on seedling Pinus strobus. ROBERT E. WEAN 1124
Twig blight of Asiatic chestnuts, especially that caused by Phomopsis ..... J. L. BEDWELL 1143
A comparative study of some effects of several different viruses on Turkish tobacco plants ..... W. M. STANLEY 1152
Isolation of variants from cultures of Phytomonas stewarti. GEORGE L. MCNEW 1161
Crinkle leaf, a new disease of cotton in Louisiana ..... D. C. NEAL 1171
Isolation of toxic substances from the culture filtrates of Trichoderma and Gliocladium ..... R. WEINDLING 1175
The anatomy of a black zone caused by Xylaria polymorpha. M. T. HILBORN 1177
Phytopathological Notes: 1180
A severe case of rhizoctonia root rot of sugar beets after potatoes ..... W. F. BUCHHOLTZ
The genus Phytomonas ..... CHARLOTTE ELLIOTT
Method of isolating single hyphal tips of Actinomyces. M. M. AFANASIEV
Book Reviews 1184
Index for Volume 27 i

Price { $6.00 per year, United States and dependencies,
$6.25 per year, Canada
$6.50 per year, elsewhere

BUSINESS MANAGEMENT

H. A. EDSON, Business Manager, U. S. Department of Agriculture, Washington, D. C.
R. S. KIRBY, Advertising Manager, Pennsylvania State College, State College, Pa.

NOTICES

All communications regarding subscriptions and back numbers should be sent to H. A. Edson, Business Manager Phytopathology, Bureau of Plant Industry, U. S. Department of Agriculture, Washington, D. C.

Subscription price. $6.00 per year United States and dependencies; Canada $6.25; other countries $6.50; current single numbers 60 cents. The journal is issued monthly beginning with Volume VIII, January, 1918.

Back Volumes IX to XXVI inclusive, (except Vol. IX, No. 1, which is not available) unbound at $8.00 per volume. All earlier volumes obtainable only in broken numbers.

Separate Numbers will be supplied from broken volumes only, when the supply becomes low. Separate numbers from Volumes IX to XXVI, $1.00 per copy; from Volumes I to VIII, $2.00 per copy. The following numbers of Volumes I to VIII, inclusive, are obtainable: Volume I, Nos. 1, 4, 6 and index; Vol. II, Nos. 1, 4, 5 and index; Vol. III, Nos. 4, 5; Vol. VI, index only; Vol. VIII, Nos. 2 to 12 and index.

Requests to supply copies of the journal must be made within 60 days from date of issue. Date of issue January 15 and monthly thereafter.

Advertisements. Rates may be secured from business management. No indorsement of any statement of claims made in advertisements is assumed by this journal or by The American Phytopathological Society.

The American Phytopathological Society

FOUNDED 1909. INCORPORATED 1915

Officers for 1937

G. W. KEITT, President (1 yr.), University of Wisconsin, Madison, Wis.

H. W. ANDERSON, Vice-President (1 yr.), University of Illinois, Urbana, Ill.

H. P. BARSS, Secretary (3 yrs. Term expires 1937), U. S. Department of Agriculture, Washington, D. C.

H. A. EDSON, Treasurer and Business Manager of PHYTOPATHOLOGY (3 yrs. Term expires 1937), U. S. Department of Agriculture, Washington, D. C.

H. B. HUMPHREY, Editor in Chief of PHYTOPATHOLOGY (3 yrs. Term expires 1937), U. S. Department of Agriculture, Washington, D. C.

Councilors for 1937

G. H. COONS (Term expires 1937), U. S. Department of Agriculture, Washington, D. C.

N. E. STEVENS (Term expires 1937), University of Illinois, Urbana, Ill.

CHAS. CHUPP (Term expires 1938), Cornell University, Ithaca, N. Y.

G. F. WEBER (1 yr. for the Southern Div.), University of Florida, Gainesville, Fla.

J. W. HOTSON (1 yr. for the Pacific Div.), University of Washington, Seattle, Wash.

Representatives for 1937

A. A. A. S. Council (1 yr.), N. E. Stevens, W. D. Valleau.

Elector Group V, Division of Biology and Agriculture, National Research Council (3 yrs.), E. C. Stakman (H. P. Barss, alternate).

Board of Governors, Crop Protection Institute (3 yrs.), J. F. Adams (Term expires 1939), C. R. Orton (Term expires 1938), W. H. Martin (Term expires 1937).

Tropical Research Foundation (5 yrs.), L. R. Jones (Term expires 1940).

International Union of Biological Sciences, Donald Reddick.

Board of Editors, American Journal of Botany, G. W. Keitt (3 yrs. Term expires 1937).

Standing Committees for 1937

Foreign Plant Diseases and Quarantines. C. R. Orton, Chm., H. T. Güssow, J. S. Boyce, W. A. McCubbin, R. D. Rands, F. J. Adams.

Extension and Research Coordination. Chas. Chupp, Chm., R. J. Haskell, S. L. Pierstorff, R. S. Kirby, E. C. Stakman, G. W. Keitt, W. B. Tisdale, I. L. Conners.

Coordination in Seed Treatment Research. C. S. Reddy, Chm., W. E. Brentzel, M. B. Moore, H. A. Rodenhiser.

Publication Problems. H. P. Barss, Chm., H. B. Humphrey, H. A. Edson, R. S. Kirby, E. C. Stakman, N. E. Stevens, M. W. Gardner, R. F. Poole, L. M. Massey, L. R. Jones, F. L. Drayton, G. W. Keitt.

Phytopathological Classics. H. H. Whetzel, Manager; H. B. Humphrey, Editor.

Necrology. A. G. Johnson, Chm., G. P. Clinton, M. B. Waite.

Investments. H. A. Edson, Chm., N. E. Stevens, Chas. Brooks, F. C. Meier, J. W. Roberts.

Donations and Legacies. F. C. Meier, Chm., E. C. Stakman, N. E. Stevens, J. G. Brown, N. J. Giddings.

New Memberships and Subscriptions. (To be added later.)

CHRONICA BOTANICA, the year-book of plant science, has been designed to bring together the research programmes of all laboratories, experimental stations, herbaria, botanic gardens, &c., to give a résumé every April of the professional and personal news of the past year and to promote co-operation between workers in the various branches of plant science in every possible way.

CHRONICA BOTANICA deals not only with general botany, taxonomy, ecology, &c., but also with agriculture, agronomy, forestry, horticulture, phytopathology, genetics, plant breeding, micro-biology, soil science, agricultural bacteriology and chemistry, plant-biochemistry, and pharmacognosy.

CHRONICA BOTANICA contains a complete annotated and up-to-date list of all laboratories, experimental stations, herbaria, botanical gardens and societies connected with every branch of plant science. Special sections are devoted to the International Botanical Congress and to other international congresses, committees, and societies. It also includes an almanac of events, past, present and future, a section for correspondence, notes on new periodicals, lists of new and changed addresses and indices of names of plants, persons, and societies.

CHRONICA BOTANICA *sends questionnaires every December to the Directors of all botanical laboratories, experimental stations, herbaria and gardens, and to the Secretaries of all botanical societies. Answers must reach the Editor before the end of January; it is impossible to use information received after that date.*

CHRONICA BOTANICA is published every April as a single volume of about 400 pages, with numerous illustrations, bound in cloth. Annual subscription **hfl. 15.-**, postage extra. For prospectus, sample pages and further information, apply to the Editorial and Publishing Office, P. O. Box 8, Leiden, Holland.

This year-book is the first and only one of its kind: it contains a vast amount of hitherto unavailable information. It answers hundreds of questions which you have previously had to leave unanswered, though they were of the greatest importance for your work. An annual subscription will well repay repay you—you cannot afford to be without the latest issue of the 'Chronica'.

CENTRAALBUREAU VOOR SCHIMMELCULTURES BAARN—NETHERLANDS

FUNGUS CULTURES FOR USE IN RESEARCH AND TEACHING IN MYCOLOGY AND PLANT PATHOLOGY

The Centraalbureau voor Schimmelcultures is a Netherlands Foundation with international activities. It aims at bringing together a collection of pure cultures of fungi from the whole world, and now has the only very large collection of fungi existing. The collection includes at present more than 5700 species and special strains of fungi of botanical, agricultural, medical, veterinary, and industrial interest. They are cultivated at headquarters at Baarn or, if yeasts, in the Laboratory for Microbiologia at Delft, for distribution throughout the world. A list of the species available is published every year and obtainable at headquarters.

Pathologists are earnestly requested to send to the collection cultures of species or strains not yet listed. Transfers of these species are available without charge to the persons who originally sent them.

Cultures are **for sale** postfree at two and a half Netherlands guilders each, or may be exchanged for species not yet listed.

Subscriptions for annual purchases are accepted at the following rates:

50 cultures a year, 60 Netherland guilders.

20 cultures a year, 30 Netherland guilders.

Fungi in culture are also accepted for identification at these rates.

Joha. Westerdijk.
Director

YOUR ADVERTISING MANAGER SUGGESTS

that we let you know that we are the Manufacturers of the following:

Kolodust (the fused Bentonite Sulphur dusts)—with and without poisons
Kolofog (the fused Bentonite Sulphur spray)
Emulso (oil emulsion)
Tar-E-Mul (Tar Oil Wash)
Arsenate of Lead **Suspenso Lead Arsenate** **Calcium Arsenate**
Copodust **Copotex**
Pink Kolodust (for dusting peaches in the packing house)
Pomo-Green (with and without Nicotine)
Rotenone Dusts and Sprays

Also that we manufacture all standard *insecticides* and *fungicides,* and *dusting* and *spraying machinery.*

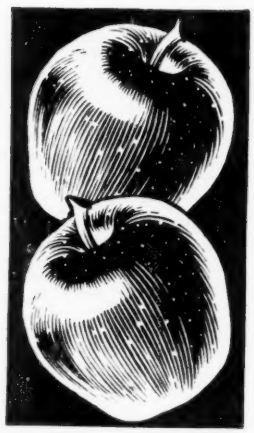
Potash and

Good Keeping Quality



HARVESTS are over and fruits and vegetables have been put into storage. Scientific research indicates that potash plays an important part in their keeping qualities.

In the case of apples, work reported shows that potash-starved trees produced fruit in which there was a large percentage of spoilage from internal browning while in storage. There was no spoilage in the fruit from trees sufficiently fed with potash to balance the other plant-food elements.

Good produce is not profitable unless it maintains its quality until it reaches the ultimate consumer.

The Standard for Microscope Glass

Gold Seal Microscope Slides and Cover Glasses

CRYSTAL CLEAR
NON-CORROSIVE
WILL NOT FOG

Gold Seal Slides and Cover Glasses are made from a glass practically free from alkali. They attain a precise uniformity of thinness and plane surface that is unparalleled. They are brilliantly crystal clear and guaranteed against corrosion, fogging or any imperfection.

Microscopic work deserves the best—specify Gold Seal Slides and Cover Glasses, priced only a trifle more than inferior grades.

PHYTOPATHOLOGICAL CLASSICS

H. B. HUMPHREY, *Editor*
Bureau of Plant Industry, Washington, D. C.

H. H. WHETZEL, *Manager*
Cornell University, Ithaca, N. Y.

CLASSIC NO. 1. FABRICIUS. Attempt at a dissertation on the diseases of plants. 1774. Translated from the Danish by Mrs. Margaret Kølpin Ravn. Price $0.50.

CLASSIC NO. 2. FONTANA. Observations on the rust of grain. 1767. Translated from the Italian by P. P. Pirone. Price $0.50.

CLASSIC NO. 3. MILLARDET. The discovery of Bordeaux mixture. Three papers. Translated from the French by F. J. Schneiderhan. Price $0.50.

CLASSIC NO. 4. WORONIN. Plasmodiophora brassicae, the cause of cabbage hernia. 1878. Translated from the German by Chas. Chupp. Price $0.75.

CLASSIC NO. 5. TILLET. The cause of the corruption and smutting of wheat. 1755. Translated from the French by H. B. Humphrey. Price $1.25.

This is a series of translations of early papers of special significance in the field of plant pathology. Others will appear as rapidly as funds for printing become available. These classics will be of interest not only to Pathologists but also to Mycologists, Plant Breeders, and others working in the field of Plant Science. These papers, in the original, are not available in most libraries.

Classics Nos. 1, 2, 3, 4 and 5, if ordered at the same time, may be had at $3.25. This offer is open for a very limited period. Remittance, (Post Office Money Order) must accompany order. Address all orders to H. H. Whetzel, Ithaca, N. Y.
